No. 393

monthly review of business statistics

AUGUST 1970

Prepared under instructions from the Honourable the Treasurer

by J. P. O'NEILL, Acting Commonwealth Statistician

Commonwealth Bureau of Census and Statistics, Canberra, Australia

Reference No. 1.4

SYMBOLS AND USAGES

The following symbols, where shown in columns of figures or elsewhere in tables mean—

- n.a. Not available.
- .. Nil or less than half the final digit shown, or not applicable.
- p Preliminary—figure or series subject to revision.
- r Figure or series revised since previous issue.
- Break in continuity of series (where drawn across a column between two consecutive figures).

A blank space in a column of figures means that the figure concerned is not yet available.

Yearly periods shown as, e.g., 1969, refer to the year ended 31 December 1969; those shown as, e.g., 1968–69, refer to the year ended 30 June 1969.

Any discrepancies between totals and sums of components in tables are due to rounding.

Values are shown in Australian dollars (\$) or cents (c).

SEASONALLY ADJUSTED INDICATORS

In the Contents, page one, page numbers of series containing seasonally adjusted indicators are marked with asterisks.

Details of the methods used in seasonally adjusting these and other series are given in *Seasonally Adjusted Indicators 1970*, issued by this Bureau in June 1970, which contains original and seasonally adjusted data in tabular and graphical form for ninety-six selected series. The seasonally adjusted indicators included therein are up-dated in relevant monthly and quarterly publications of this Bureau.

As well as being adjusted for normal seasonal factors, some of the statistical series included in the Review have been adjusted for the effects of some calendar irregularities, namely: 'trading-day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the influence of moveable holidays, i.e., Easter and Australia Day. The adjustments made to each series are indicated in Appendix B of *Seasonally Adjusted Indicators 1970*.

For explanatory matter on seasonal adjustment of National Accounts see the supplement to the March Quarter 1969 issue of *Quarterly Estimates of National Income and Expenditure*.

GRAPHS

The *Digest of Current Economic Statistics*, published monthly by this Bureau, contains in tabular and graphical form a selection of the more important series included in this publication.

(a) Excludes particulars of full-blood Aborigines prior to 1 January 1967. (b) Excess of births registered over deaths registered. (c) Excess of recorded overseas arrivals over recorded overseas departures. (d) Excludes full-blood Aborigines prior to 30 June 1961. (e) Increase consists of natural increase, net overseas migration gain and an adjustment to make the series of increases agree with the total intercensal increase revealed by successive censuses. (f) Population at Census date. The difference between the statistics as here published and those shown in Census publications, which exclude full-blood Aborigines, cannot be taken as reliable statistics of the full-blood Aboriginal population. (g) Includes an estimate for full-blood Aborigines out of contact at the Census.

OVERSEAS ARRIVALS AND DEPARTURES

Permanent movement—persons arriving with the stated intention of settling permanently in Australia, and Australian residents departing with the stated intention of residing permanently abroad.

Long-term movement—arrival of visitors and temporary departure of residents with the stated intention of staying (in Australia or in a country abroad respectively) for twelve months or more and the departure of visitors and return of Australian residents who have stayed (in Australia or in a country abroad respectively) for twelve months or more.

Short-term movement—all other overseas arrivals and departures, including those of Australian troops irrespective of period of stay and U.S. troops visiting Australia on rest and recreation leave. The latter are classified for statistical purposes as short-term visitors.

Crew members, persons passing through Australia on board the same ship or on the same flight (variously called direct transit passengers or 'through' passengers) and passengers on short pleasure cruises commencing and finishing in Australia on ships not then engaged in regular voyages, are excluded from these statistics.

(a) The figures in this table, except those relating to Government employees, are based on comprehensive data from the Population Census of June 1966. For the period subsequent to the census the employment data are obtained from three main sources, namely (i) current pay-roll tax returns, (ii) current returns from Government bodies, and (iii) some other current returns of employment (e.g. for hospitals); the balance, i.e. unrecorded private employment, is estimated. Month-to-month changes shown by current returns are linked with the benchmark data to derive the monthly estimates. At June 1966 recorded employment obtained from the foregoing sources accounted for about 85 per cent of the total number of employees in the industries covered, as determined by the census. (b) Includes law and order; religion and social welfare; health services; education; and other community and business services. (c) Includes forestry, fishing and trapping; mining and quarrying; electricity, gas, water and sanitary services; and communication. (d) Affected by industrial disputes.

VALUE OF RETAIL SALES(a): COMMODITY GROUPS*

Figures are on a basis comparable with the 1961-62 Retail Census. The figures in the table below relate to retail sales of goods (as distinct from services, repairs, accommodation, entertainment, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards. Hotels, garages and service stations are also included in respect of goods sold, but establishments such as clubs and guest houses are entirely excluded. Figures for the year 1961-62 are derived from a census taken in respect of that year, whereas other figures are estimates made by means of sample surveys.

VALUE OF RETAIL SALES(a): COMMODITY GROUPS

Figures are on a basis comparable with the 1961-62 Retail Census. The figures in the table below relate to retail sales of goods (as distinct from services, repairs, accommodation, entertainment, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards. Hotels, garages and service stations are also included in respect of goods sold, but establishments such as clubs and guest houses are entirely excluded. Figures for the year 1961-62 are derived from a census taken in respect of that year, whereas other figures are estimates made by means of sample surveys.

WHOLESALE TRADE

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, goods sold by wholesale in Australia including imports are taxable. The returns do not relate to all wholesale trades as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustment to be made to the crude figures on this account.

(a) The series shown for years prior to 1966-67 are not strictly comparable to the series shown from 1966-67 onwards (see the bulletin referred to at the head of this page). (b) These percentages may be used in analysing the contribution of each group to movements in the total index. (c) Includes, in October 1968, H.M.A.S. 'Brisbane' valued at \$36.8 million at current prices. (d) Imports in February and March 1969 were affected by industrial disputes in ports on the East Coast of U.S.A. and Canada.

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX

The table below contains particulars of selected groups and 'All Groups' of the Wholesale Price (Basic Materials and Foodstuffs) Index. As indicated in the next paragraph, the index is outmoded. It is published for current months in the form shown in the table as an interim service mainly to meet the needs of those who, for special purposes, require the particular series included. Publication of these index numbers will be discontinued, with advance notice, as new measures now in course of preparation are published.

The weighting system adopted in this index is based on estimates of the average annual consumption of included commodities in Australia in 1928-29 to 1934-35. The validity of the weighting and the representativeness of the index have become increasingly affected by changes in usage and in industrial structure. New series of wholesale price index numbers relating to materials used and articles produced by defined areas of the economy are being developed. The first of these indexes, referring to materials used in building other than house building, was published in statistical bulletin Ref. No. 9.6 of 23 April 1969 (see pages 26 and 27). Work continues on the preparation of two further measures relating to materials used in house building and in manufacturing industry respectively. Taken together these first three series will, to a considerable extent, constitute a currently representative replacement for the Wholesale Price (Basic Materials and Foodstuffs) Index. In this regard, it should be noted that the Building Materials group has been largely superseded by the new index referred to above.

Commodities in the Wholesale Price (Basic Materials and Foodstuffs) Index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants.

(a) Special purpose index for the 'Metals and coal' group excluding coal and briquettes: May 1970, 564.

(b) This index is subject particularly to movements in the prices of imported softwood timber, a major component of the group. See also paragraph 2 of notes at head of table and pages 26 and 27.

(c) In addition to the groups shown, includes Oils, fats and waxes; Textiles; Chemicals; and Rubber and hides.

WHOLESALE PRICE INDEX OF MATERIALS USED IN BUILDING OTHER THAN HOUSE BUILDING

See note at top of page 26. The separate city indexes shown below measure price movements within each city individually. They do not compare price levels as between cities.

PRICE INDEXES: VARIOUS COUNTRIES

(Source: Monthly Bulletin of Statistics of the Statistical Office of the United Nations.)

The index numbers show fluctuations in prices in each country and do not measure relative price levels as between countries.

The items priced and the levels at which they are priced in these indexes vary widely according to the intended purposes of the indexes of the various countries. A short dash on each side of an index number (e.g., -101-) indicates that two series have been linked at that period.

SHARE PRICE INDEX

This index relates to ordinary shares of the principal companies (excluding banks) listed on the Sydney Stock Exchange, and whose business in New South Wales is extensive. The prices of individual shares are unweighted and each group average is the mean of the average monthly prices per \$2 of paid-up capital. Adjustments are made for changes in the capital structure of the companies. The total index is the average of all the shares included in the groups with the addition of thirty-four miscellaneous shares.

(a) For a full week's work (excluding overtime), as prescribed in awards, determinations and agreements. Excludes rural. Rates shown should not be regarded as actual current averages, but as indexes expressed in money terms, indicative of trends. They do not measure the relative level of minimum wages as between States. Figures for July 1968 and subsequent months are subject to revision. (b) Excludes rural and shipping and stevedoring.

AVERAGE WEEKLY EARNINGS(a) PER EMPLOYED MALE UNIT(b)

The following figures are derived from employment and wages and salaries recorded on pay-roll tax returns, from other direct collections and from estimates of the unrecorded balance. The figures relate to civilians only.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. (b) Total wages and salaries, etc., divided by the total number of civilian employees expressed in male units, i.e., total male employees plus 55 per cent of female employees. This proportion is derived from the estimated ratio of female to male earnings in Australia. As it was not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above. (c) Includes the Australian Capital Territory. (d) Includes the Northern Territory. (e) All industries—Australia base 1953-54=100. There has been no change in the basis of seasonal adjustment of this series. It has not yet been adjusted by the programmes used for other Bureau series.

Note. Quarterly figures shown in money terms are affected by seasonal influences. Comparisons as to trend are generally best made by relating complete years or corresponding periods of incomplete years. However, from December quarter 1963, comparisons with corresponding quarters of earlier years are affected by additional prepayments arising from extensions of annual leave from two to three weeks.

CAPITAL EXPENDITURE BY PRIVATE BUSINESSES

These statistics are designed primarily to measure trends in expenditure by private businesses on fixed tangible assets. The statistics are based on returns obtained from private businesses subject to pay-roll tax (other than businesses in rural, professional, gas and electricity industries), from government banks and airlines, and from other businesses not subject to pay-roll tax which undertake projects of more than \$500,000 in any half year. For statistics of capital expenditure by all private businesses, see the series 'Gross Fixed Capital Expenditure' on page 59 of this publication.

INDUSTRIAL PRODUCTION INDEXES: VARIOUS COUNTRIES

(Source: *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations)

Unless otherwise stated, the indexes shown below include mining, manufacturing, electricity and manufactured gas but exclude construction. When the indexes are adjusted for differences in the number of working days per month or for seasonal variations they are footnoted accordingly. A short dash on each side of an index number (e.g., -119-) indicates that two series have been linked at that period.

(Base of each index: Year 1963=100)

(b) Includes all truck-type vehicles.

RAILWAYS AND SHIPPING

Part of the shipping cargo is recorded in tons weight and part in tons measurement. As the total cannot be stated accurately as either tons weight or tons measurement, each is recorded and published separately; 1 'ton measurement' equals 40 cubic feet.

(a) For current account balances, minus sign (—) denotes deficit; for capital items other than monetary movements, minus sign (—) denotes outflow; for monetary movements, minus sign (—) denotes a decrease in assets, or an increase in liabilities, or an allocation of Special Drawing Rights. (b) The amounts shown represent the recorded trade figures adjusted for balance of payments purposes. Adjustments affect both coverage and valuation. (c) Excludes the effects of the November 1967 devaluation of the pound sterling and other currencies which reduced by \$111 million and \$2 million, respectively, the Australian dollar equivalents of official reserve assets and other foreign assets. (d) Not yet available; included in the balancing item. (e) Includes item marked (*). (f) Includes an increase of \$75 million due to the allocation of S.D.R.'s.

Note. For more detailed information see the half-yearly mimeographed bulletin *Balance of Payments* (Ref. No. 8. 1).

Series revised.

NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA

The following statistics show the net amount of cash transferred from the investing public to companies in Australia through the types of capital specified. For this purpose the 'investing public' includes banks and life insurance companies (except when subscribing to issues by associated companies) and superannuation funds. The statistics do not include changes in bank overdraft, loans to authorised dealers in the short-term money market, or deposits accepted by banks, insurance companies, pastoral companies or building societies.

(a) See footnote (a) page 63.

(b) This series has been compiled from information supplied by the major trading banks as at second Wednesday of each month. The figures represent gross new lending commitments of banks and do not take account of cancellations and reductions of existing limits. Figures for cancellations and reductions of existing limits can be estimated from this series (after deducting term loan and farm development loan components and adjusting the weekly average to a monthly basis) in conjunction with that of overdraft limits. However, such estimates should be regarded as an approximation only, since there are unavoidable differences in the basis of compilation of the two series.

(c) Excludes limits in respect of temporary advances to woolbuyers, term loans and farm development loans.

(d) Year ended second Wednesday of July.

FINANCE COMPANIES

The following series of statistics cover the main types of lending by finance companies in Australia, including instalment credit for retail sales, wholesale hire purchase, other consumer and commercial loans (comprising personal loans, mortgage loans and advances), factoring, leasing and bills of exchange. Information on the scope of these statistics and the definition of items are included in the bulletin *Finance Companies, 1969* (Ref. No. 5.13), which in addition contains more detailed statistics. Supplementary classifications are also provided for the instalment credit for retail sales transactions of finance companies. Amount financed is classified by type of commodity and collections and other liquidations is divided between cash collections and other liquidations.

(a) Figures for New South Wales represent combined transactions of consolidated revenue fund and business undertakings—railways, tramways, omnibuses and Sydney Harbour Trust section of Maritime Services Board—included in annual Budget Papers. New South Wales monthly figures have also been adjusted to exclude debt charges recouped by business undertakings outside the budget. Adjustments have been made to exclude duplications.

(b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payment to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State consolidated revenue funds in respect of States grants (financial assistance), the interest on State debts, special grants, special financial assistance, grants to universities, tuberculosis capital expenditure and national welfare fund payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.
